SKILLS

Competencies

Full implementation lifecycle
Technical translation
Stakeholder communication
Requirements & scoping
Project management
General Software Engineering

Languages & Frameworks

TypeScript · JavaScript · Vue
NestJS · Node.js · Fastify
C# / ASP.NET · Entity Framework
MySQL · Relational · Normalization

Tools & Platforms

Make.com · HubSpot · Intercom
Microsoft Entra / AD
Docker · Linux · Git

INTEGRATIONS

25+ HR, communication and finance systems including Personio, SuccessFactors, HubSpot, Microsoft Entra / AD, Intercom and E-Conomic

LANGUAGES

Danish - Native
English - Full professional

PROFILE

I design, build and own technical solutions end to end - from the first customer conversation and shaping the architecture to implementation, delivery and ongoing support. My MSc in Computer Science and Engineering, specializing in Software Engineering, from DTU gives me a strong technical foundation, complemented by hands-on experience with integrations, APIs and customer-facing technical leadership. My real strength, however, is translating complex technical setups into something every stakeholder can understand - whether that is a senior engineer discussing architecture or a Head of HR focused on the business outcome.

EXPERIENCE

Oct 2025 - Present
Technical Solutions Engineer
Learningbank

- Own the full implementation lifecycle for customer integrations - from pre-sales and scoping through to build, testing, sign-off and ongoing support, maintaining direct customer contact throughout
- Took full ownership of the standard integration catalogue, continuously expanding it with new connectors and maintaining everything it ships with
- Co-architecting, building and maintaining the platform's public-facing API, enabling customers to build and manage their own integrations independently

Sep 2023 - Oct 2025
Integration Developer (Part-time)
Learningbank

- Built and maintained custom integrations and automations, connecting a wide range of external HR systems to the platform
- Developed custom JavaScript functions to use in integrations within Make.com, tailoring automated workflows for client-specific processes

Feb 2025 - Jul 2025
Technical Lead (Master Thesis)
Axion

- Led the full technical design and implementation of an Android application in Kotlin, allowing users to limit screen time by blocking apps and websites
- Designed and built the cloud backend in C#/ASP.NET on Azure, including the REST API, MySQL database, CI/CD pipelines via GitHub Actions, and error monitoring with Sentry and Firebase Analytics
- Defined the entire tech stack from scratch and owned every technical decision from first architecture to production - thesis awarded a grade of 12 (A)

Nov 2022 - May 2023
Software Developer (Part-time)
SkanCode A/S

- Built REST API integrations in Java Spring Boot on AWS, connecting third-party services like GLS and financial platforms, to the low-code system (Caspio) the company used.
- Designed and maintained T-SQL databases to support reliable data exchange between systems
- Worked directly with customers to scope integration projects - my first real experience understanding what people actually needed before building the solution

May 2021 - Jan 2022
Website Developer (Freelance)
Reinhardt Dans ApS

- Designed and built a custom WordPress site from scratch - custom theme, tailored plugins, responsive design, contact forms and SEO setup
- Provided ongoing maintenance and trained the administrators on managing the CMS themselves, ensuring they were self-sufficient after handover

EDUCATION

2023 - 2025
MSc in Computer Science and Engineering - Software Engineering
Technical University of Denmark (DTU)

Grade: 12 (A) · Diploma

2019 - 2023
BSc in Engineering - Software Technology
Technical University of Denmark (DTU)

Grade: 10 (B) · Diploma

CERTIFICATIONS

2022
Project Management Diploma - ISO 21500 & ISO 21502
Fonden Dansk Standard

No expiration · Certificate

A LITTLE ABOUT ME

A fact most colleagues find out eventually: before all of this, I was a professional dancer who competed at the European & World Championships. Different kind of choreography these days to be honest, but same obsession with getting the details just right.
